## **NARRATIVE GRIDS**

This is a collaborative tool that allows us to put together various contents, in order to create any kind of publication. Nine grids designed for contents that present sequences of instructions for an action, using different narrative structures. It can be used to design any kind of publication.

You can choose the grid that best fits the narrative structure of your contents or that attracts you the most. The templates serve as guides or clues. Feel free to intervene it with any digital tool, or print it and write or draw over it. Also feel free to make changes to the grids in any way you need.

### **01 Recipe**

Linear instructive narration with a list of materials and step-by-step instructions.

### **02 Illustrated Book**

Ambiental image sequence with story telling text.

### **03 Comic Book**

Linear images sequence with match-up text.

### **04 Musical Score**

Code shaped text with linear general structure, which allows instantaneous stories.

### **05 Artist Book**

Image only, of different kinds.

### **06 Script**

Descriptive text with a great amount of details.

### **07 Poem**

Structure-free texts / text as image.

### **08 Conversation**

Dialogue structure with spoken or phone messaging app language.

### **09 Video**

Video narration with stills.

## **NOTES:**

We created this tool for the *Toolbox: on how to create communities in times of uncertainty* publication <https://toolboxcommunity.org/>.

We were inspired to create it by the book *Breadcrumb* (Onomatopée, 2019). It blows up the narrative structure of a recipe, opening it up to many other ways of presenting them.
